Compliance with the following standards:

ASTM A74-2021, Standard Specification of Cast Iron Soil Pipe and Fittings

Identification:

Each length of pipe and each fitting shall be plainly marked with the country of the origin, the manufacturer's initials or registered trademark by which the manufacturer can be readily identified after installation, and with letters to indicate the proper classification, as follows:

XH Extra Heavy
SV Service

The marking shall be cast, stenciled, or otherwise applied on the pipe so as to be clear and legible after installation. The marking shall be cast on fittings and shall be clear and legible after installation and located away from the spigot end so as not to interfere with proper joining upon installation.

Each pipe shall be marked with the date of manufacture. The marking shall be a minimum of 3/4 in. size.

The ICC-ES PMG mark of conformity may be put on the product as an option.

Models:

Cast iron soil pipe and fittings for use in gravity flow applications. These pipe and fittings are not intended for pressure applications as the selection of the proper size for drain, waste, vent and storm drain systems allow free air space for gravity drainage.
