3.0 DESCRIPTION

The products are grey cast iron pipe and fittings produced in a variety of sizes and shapes.

4.0 CONDITIONS

4.1 Code Compliance:

See ICC-ES listings [PMG-1082](#) and [PMG-1083](#) for compliance with code requirements.

4.2 Green Codes, Standards and Rating Systems Eligibility:

The information presented in Tables 2 through 9 of this report provides a matrix of areas of evaluation and corresponding limitations and/or additional project-specific requirements, and offers benefits to individuals who are assessing eligibility for credits or points.

The final interpretation of the specific requirements of the respective green building rating system and/or standard rests with the developer of that specific rating system or standard or the authority having jurisdiction (AHJ), as applicable.

Compliance for items noted as “Verified Attribute” is subject to any conditions noted in the tables. Decisions on compliance for those items noted as “Eligible for Points” in Tables 2 through 9 rest with the user of this report, and those items are subject to the conditions noted. The user is advised of the project-specific provisions that may be contingent upon meeting specific conditions, and the verification of those conditions is outside the scope of this report. Rating systems or standards often provide supplemental information as guidance.

The total percentage of recycled content reported is based upon assigning an equal value for each type of recycled content used in accordance with IgCC Section 505.2.2, ICC 700 Section 604.1 and ANSI/GBI 01-2010 Section 10.1.2. Where the recycled content values are used for determination of compliance with requirements other than the IgCC, ICC 700 and ANSI/GBI 01, the total percent of recycled content must be calculated in accordance with the percentage requirements stated in that document.

Due to the variability of costs and volume, the recycled content percentage listed in this report is based upon weight (mass). The use of cost or volume as the method for calculation is outside the scope of this report.

5.0 BASIS OF EVALUATION

The information in this report, including the “Verified Attribute,” is based upon the following supporting documentation:

ICC-ES EC101(Evaluation applies to IgCC Section 505.2.2; CALGreen Sections A4.505.3 and A5.405.4; ICC 700 Section 604.1; LEED Homes MR Credit 2.2; LEED NC MR Credit 4; LEED Schools MR Credit 4; ANSI/GBI 01 Section 10.1.2.1 and 10.2.2.1; CSI GreenFormat Section 2.3.3)
