New Video Captures Sound Test of DWV Plumbing Systems

CHARLOTTE, NC – January 13, 2016. A new video on Charlotte Pipe’s YouTube channel, youtube.com/charlottepipefoundry, shows a sound test of various DWV plumbing systems. Materials tested are cast iron soil pipe, solid wall PVC and foam core PVC, with and without insulation products. Users can watch the entire video or jump to the material they are most interested in viewing.

Charlotte Pipe performed this experiment after receiving questions about the sound of PVC systems and the best way to minimize the noise. Please note, this test is an experiment, not an endorsement of a pipe material or insulation. However, as you’ll see, cast iron does offer the quietest performance of all materials tested.

About Charlotte Pipe and Foundry Company

Charlotte Pipe and Foundry is the only manufacturer that offers a system of ABS, PVC, CPVC, cast iron, FlowGuard Gold®, and ChemDrain® pipe and fittings for residential and commercial plumbing systems and industrial applications. The nation's leading maker of cast iron and plastic pipe and fittings, Charlotte Pipe and Foundry offers the industry's broadest product offering of standard and specialty DWV products.

Charlotte Pipe and Foundry is headquartered in Charlotte, NC, and has seven plant locations across the United States. Combining modern technology with a century of craftsmanship and experience, Charlotte Pipe and Foundry has a proud legacy of commitment to the industry and its customers. The company is guided by the philosophy of its founder - produce the best product possible and provide the best service for the customer.
