Charlotte Pipe Adds Plastic Fittings Production, Cast Iron Storage and Jobs to Utah Location

CHARLOTTE, NC – June 6, 2018 – Charlotte Pipe recently added plastic fittings production to its Cedar City, UT facility. The expansion added over 157,000 square feet to the plant, bringing the total in Utah to over 300,000 square feet. There is storage space for over 4,300 pallets of fittings alone. The expansion also added 30 jobs.

This is not the first time Charlotte Pipe has added major capabilities to its West Coast operations. In 2010, the company began storing cast iron pipe and fittings in Cedar City, cutting the delivery time for customers in the west.

These investments show Charlotte Pipe's commitment not only to its customers, but to the communities in which it does business. As the company celebrates its 10-year anniversary in Utah, its focus on people, products and service remains front and center. The company is excited to see what the next 10 years will bring.

About Charlotte Pipe and Foundry Company

Charlotte Pipe and Foundry is the only manufacturer that offers a *system* of ABS, PVC, CPVC, cast iron, FlowGuard Gold[®], and ChemDrain[®] pipe and fittings for residential and commercial plumbing systems. The nation's leading maker of cast iron and plastic pipe and fittings, Charlotte Pipe and Foundry offers the industry's broadest product offering of standard and specialty DWV products.

Charlotte Pipe and Foundry was founded in 1901 and is headquartered in Charlotte, NC. The company is American-owned and American-made, with seven plant locations across the United States. Combining modern technology with more than a century of craftsmanship and experience, Charlotte Pipe and Foundry has a proud legacy of commitment to the industry and its customers.
